They pushed Ms. He, in her chemise and bare feet, onto the third floor balcony and threatened to send her to Jiamusi again if she did not jump off the balcony. In desperation, Ms. He jumped. She fell headlong to the ground and sustained four broken ribs, two broken femurs, and a shattered pelvis. Ms. He was in critical condition in the hospital.

Introduction to Falun Dafa

Falun Dafa, also known as Falun Gong, is a practice for benefiting physical health and elevating the mind. Introduced by Mr. Li Hongzhi in China, the practice consists of five gentle exercises including meditation, and diligent effort on the part of practitioners to follow the universal principles of Truthfulness-Compassion-Forbearance in daily life. Falun Gong is not only beneficial to one's own health and well-being, it also benefits others. Although the practice originated in China, today it is practiced throughout the world by people of all races and walks of life. In the face of the most brutal and vicious persecution perpetrated on them by the Chinese Communist Party, Falun Gong practitioners have found the spiritual strength to resist peacefully and tirelessly by upholding the principles of Truthfulness-Compassion-Forbearance.

Practicing Falun Gong, My Brain Tumor Disappeared and My Husband Recovered from a Stroke

(Clearwisdom.net) I am a farmer from Hunan Province. Prior to practicing Falun Gong I was troubled by all kinds of illnesses. I suffered from frequent headaches, dizziness and general infirmity. In 2000 my headaches got worse and I frequently had nausea and vomiting. Later I was diagnosed with a brain tumor. According to my doctor, I needed brain surgery, but there was no way to guarantee my safety during and after surgery, and I would have to make a down payment of 30,000 yuan for the operation. I'm a farmer with very limited financial resources and I'd already spent all of my savings on medical treatments trying to cure my illnesses. I had no choice but to go home and hope for the best.

While I awaited my fate, my cousin came to visit me. He told me, "Since no medication can save you now, why don't you join me in practicing Falun Gong? It's very good. As long as you follow the teachings of Falun Gong sincerely and do the daily studying and exercises, Teacher will take care of you. All your incurable diseases will be cured. I have brought you this priceless book, *Zhuan Falun*. Read it and you'll get better." He was so confident and sincere. I said to myself, "I'm dying anyway. Since Falun Gong is said to be so powerful, why not give it a try? I've got nothing to lose."

I started reading *Zhuan Falun*. There were many characters in the book that I didn't know, so my husband taught me those words. After I finished the first three chapters, I started having symptoms of diarrhea, but I was able to tolerate it. I gradually felt better and I knew that Teacher was cleansing my body and helping me get rid of my illness karma. My cousin had explained those things to me in general terms, and I'd learned something of them from reading the first chapters. From then on I felt more and more confident.

After I finished reading all nine chapters of the book, I could participate in indoor activities and the mental pressure from my critical illness disappeared. The symptoms of headache, dizziness and swelling in my face and head also showed clear improvement. I finally experienced the happiness that can only be known by a healthy person.

In August of 2005 my husband suddenly felt a shock through his body. Then his limbs felt numb and he became hemiplegic. He had a stroke, as it turned out. I told my husband, "You should join me in practicing Falun Gong. You know how sick I was, yet I was cured by Falun Gong. Now is the right time for you to start practicing Falun Gong." My husband had witnessed my illnesses being cured and agreed to take my advice. From then on we both practiced Falun Gong and read the book daily. In just a few short months my husband had fully recovered.
